

Anti-Covid-19 Ambulance

CONTACTLESS CHECK-UP MOBILE CLINIC

This mobile COVID -19 testing Van can do the rapid testing of COVID at site, it is mobile to do testing at different locations, can be moved to remote and crowded areas easily.

The Testing Van can be taken to locations and do the testing instead of getting suspected patients to hospitals or locations, this will save tremendous time and ease of testing

The Van is completely contactless for safety of doctors and healthcare workers which is a bigger challenge in testing of COVID -19

Salient Features:-

Completely contact less for testing of COVID 19.

Healthcare workers will communicate with patient by speaker and mike inside the van and guide the patient how to give and store the sample without getting in touch with the patient.

Patient will communicate by mike outside the van with Doctor

Doctor and patient will not touch or get in physical contact with each other

- 100 % SAFETY FOR DOCTORS AND HEALTHCARE WORKERS
- Easily transport the Van to remote areas for rapidly testing – Mobile Van
- Seating available for doctor and Paramedic staff + driver
- Mobile or tablet mount with charging option for keeping online records
- Foldable table outside the van transport of the van
