

Extraction/spine immobilization device Extricador/inmovilizador espinal

This appliance conforms with the Directive 93/42/CEE "Medical Devices".

Se declara que el dispositivo es conforme a la Directiva 93/42/CEE "Dispositivos Médicos".

All immobilizing procedures must be carried as prescribed by the local protocols in use and following the local specifications. Immobilize the patient's head with arms, in order to maintain the spinal column alignment.

Para todos los procedimientos que conciernen la inmovilización del paciente atenerse siempre a los protocolos en uso, según las directivas de la autoridad local. Inmovilizar la cabeza del paciente con las manos, preservando el alineamiento de la columna vertebral.

Apply a rigid cervical collar of the suitable size.

Aplicar un collarín cervical rígido de la medida adecuada.

Extracteur/immobilisateur de rachis Estricatore/immobilizzatore spinale

Nous déclarons que les dispositifs sont conformes à la Directive 93/42/CEE "Dispositifs Médicaux".

Si dichiara che il dispositivo è conforme alla Direttiva 93/42/CEE "Dispositivi Medici".

Pour toutes les procédures qui concernent l'immobilisation du patient il faut toujours suivre les procédures en vigueur selon les directives des autorités sanitaires locales. Immobiliser la tête du patient avec les mains, en préservant l'alignement de la colonne vertébrale.

Per tutte le procedure che riguardano l'immobilizzazione del paziente fare sempre riferimento ai protocolli in uso, secondo le direttive dell'autorità sanitaria locale. Immobilizzare il capo del paziente con le mani, preservando l'allineamento della colonna vertebrale.

Appliquer un collier cervical de type rigide de taille adaptée au cou du patient.

Appicare un collare cervicale di tipo rigido della misura idonea.

Positionner l'attelle cervicaux thoracique à l'arrière du dos du patient et l'aligner à la colonne vertébrale. La partie de l'immobilisateur où sont appliquées les sangles doit être placée vers l'extérieur.

Posizionare l'estricatore dietro la schiena del paziente e allinearla alla colonna vertebrale. Mantenere rivolto verso l'esterno il lato su cui sono applicate le cinture.

Après avoir inséré correctement le SED, avant de le serrer au patient, libérer les sangles du cuissard faisant tomber ces dernières sur les côtés. Envelopper le buste du patient avec les ailettes abdominales. Régler la position du dispositif le soulevant jusqu'au moment que les ailettes abdominales soient un soutien pour les aisselles.

Dopo avere inserito correttamente il SED, prima di chiuderlo attorno al paziente, liberare le cinture inguinale dal dorso lasciandole scendere ai lati. Avvolgere i lembi toracici attorno al busto del paziente. Regolare la posizione del dispositivo sollevandolo affinché i lembi toracici diventino un sostegno per le ascelle.

Attacher les sangles thoraciques selon la séquence suivante, généralement reconnue correcte parmi les différentes possibles: • intermédiaire (jaune) • inférieure (rouge) • supérieure (verte)

Cette séquence ne peut pas être utilisée pour tous des différents scénarios.

Suivre les directives imposées par l'Agence Régionale de santé.

En cas d'utilisation sur femme enceinte il est indispensable de replier la partie mobiles des bandes thoraciques de façon à laisser découvrir l'abdomen.

Une possible configuration de fermeture, qui peut par contre varier en fonction de la dimension de l'abdomen et de la poitrine, est la suivante: • Sangle intermédiaire sur la propre boucle • Sangle inférieure sur la boucle supérieure • Sangles supérieure sur la boucle inférieure

Aggiungere le cinture toraciche secondo la seguente sequenza, generalmente riconosciuta come corretta: • intermedia (gialla) • inferiore (rossa) • superiore (verde)

Tale sequenza può non essere indicata in tutte le situazioni di soccorso. Seguire le direttive della propria autorità sanitaria locale.

Nel caso di applicazione su pazienti gestanti è necessario ripiegare una parte dei lembi toracici in modo da lasciar scoperto l'addome.

Una possibile configurazione di chiusura, che può però variare a seconda della dimensione dell'addome e del seno, è la seguente: • Cintura intermedia nella rispettiva fibbia • Cintura inferiore nella fibbia superiore • Cintura superiore nella fibbia inferiore

Serrare les sangles inguinales tout en les passant sous les jambes du patient les accrochant sur les boucles positionnées sur la partie opposée.

Chiudere le cinture inguinale facendole scorrere sotto le gambe del paziente agganciandole alle apposite fibbie poste sul lato opposto.

Le serrage des sangles inguinales devra s'effectuer au moment du transfert du patient. L'utilisation des sangles inguinales demande une attention particulière en cas de fractures du col du fémur ou du bassin.

Les poignées du dispositif peuvent aider pour obtenir un meilleur positionnement vertical de l'attelle cervico thoracique et pour un meilleur alignement.

Il serraggio delle cinture cosciali dovrà essere effettuato al momento del trasferimento del paziente. L'uso delle cinture inguinale richiede particolare attenzione in caso di fratture al femore o al bacino. Le maniglie del dispositivo, possono aiutare ad ottenere un miglior posizionamento verticale del dispositivo e un suo miglior allineamento.

L'immobilisation de la tête, uniquement après avoir bien vérifié le juste positionnement de l'attelle cervico-thoracique en fonction aux dimensions du patient. Faire très attention à ne pas provoquer des mouvements de la tête et du cou pouvant compromettre l'état de santé du patient. Si nécessaire, combler l'espace située entre la bande de tête et la partie postérieure de la tête de la victime avec le coussin de support. Fixer la sangle mentonnière tout en soutenant le collier cervical et puis l'incliner vers les oreilles du patient.

En opérant de cette façon on évite d'immobiliser la mandibule et de bloquer l'ouverture de la bouche. Fixer la sangle frontale perpendicolairement à la surface de l'os frontal. Toutes les sangles doivent être fixées de manière symétrique.

Immobilizzare il capo solo dopo avere verificato la corretta posizione dell'estricatore in relazione alle dimensioni del paziente. Prestare attenzione a non causare movimenti del capo e del collo che possano compromettere lo stato del paziente. Se necessario, riempire lo spazio nucleare con l'apposito cuscino di supporto. Fissare la fascia mentoniere avendo cura di sostenere il collare cervicale e inclinarla verso le orecchie del paziente. In questo modo si evita di immobilizzare la mandibola e impedire l'apertura della bocca. Fissare la fascia frontale perpendicolarmente alla superficie dell'os frontale. Tutte le fasce devono essere fissate in modo simmetrico.

Après avoir contrôlé le bon serrage de toutes les sangles et les conditions de santé du patient, il sera donc possible procéder à l'immobilisation. Pour effectuer le transfert il faut ainsi nécessairement serrer la sangle thoracique, qui sera relâchée lors que le patient sera immobilisé sur le plan dur vertébral. Durant l'utilisation éviter tout type de force supérieure à 12 kg, pouvant agir sur une flexion longitudinale. En cas de soulèvement vertical du patient, il est indispensable de vérifier que la force appliquée soit distribuée de manière uniforme sur toutes les poignées, tout en respectant la capacité de charge maximale pour ce dispositif. Après avoir transféré le patient sur un autre dispositif tels que un plan dur vertébral ou une civière, immobiliser le patient en utilisant les systèmes de maintien dédiés.

Dopo avere controllato la chiusura di tutti i fissaggi e le condizioni del paziente sarà possibile controllare la immobilizzazione. Per effettuare il trasferimento occorre stringere anche la cintura toracica, che verrà allentata al momento del fissaggio sulla tavola spinale. In fase di sollevamento evitare qualsiasi tipo di forza a flessione longitudinale maggiore di 12 kg. In caso di trasferimento su altro dispositivo quale tavola spinale o barella, immobilizzare il paziente utilizzando gli appositi sistemi di fissaggio.

Once the correct closure of all fixings and the condition of the patient have been checked, the patient can be moved. To move the patient the thorax belt must be tightened. It should then be loosened when the patient is fixed to the spinal board. During use, pressure and lengthwise flexion must not exceed 12 kg. If the patient is vertically lifted, make sure that the force is equally distributed on all handles according to the maximum loading capacity of the device. When the patient has been transferred to another device such as spinal board or a stretcher, immobilize him using proper fixing devices.

Después de haber controlado el cierre de todas las fajas y las condiciones del paciente, será posible seguir con su traslado. Para efectuar el traslado hay que apretar el cinturón torácico, que se soltará en el momento de colocación sobre la tabla espinal.

Durante la fase de uso, evitar cualquier tipo de fuerza a flexión longitudinal mayor de 12 kg. En caso de levantamiento vertical del paciente, asegurarse que la fuerza sea distribuida de manera igual sobre todos los mangos, respetando la capacidad máxima del dispositivo. Una vez colocado el paciente encima de otro dispositivo, como una tabla espinal o una camilla, inmovilizar el paciente usando las fijaciones adecuadas.

Specific warnings/ Advertencias específicas/ Précautions spécifiques/ Avvertenze specifiche

- The use of the device requires the presence of at least two trained and qualified operators.
- Avoid torsions of the patient's thorax during the application of the device and belts adjustment.
- The use with other devices or systems that are not approved by the manufacturer, may cause serious injury to the patient and could cause accidents.

- Para el uso del dispositivo es necesaria la presencia por lo menos de dos operadores entrenados y cualificados.
- Evitar torsiones del tórax durante la aplicación del dispositivo y la regulación de los cinturones.
- La colocación de otros dispositivos/fijaciones al dispositivo mismo, que no hayan sido aprobados por el fabricante, puede causar graves lesiones al paciente y/o ser fuente de accidentes.
- Pour l'utilisation du dispositif il est nécessaire la présence de minimum deux opérateurs formés et qualifiés est indispensables.
- Eviter des torsions du thorax du patient durant la mise en place du dispositif et ajuster les sangles.
- La fixation sur le dispositif d'autres dispositifs ou systèmes n'étant pas approuvés par le fabricant, peut engendrer des graves lésions au patient et/ou provoquer des accidents.
- Per l'utilizzo del dispositivo è necessaria la presenza di almeno due operatori adestrati e qualificati.
- Evitare torsioni del torace del paciente durante l'applicazione del dispositivo e la regolazione delle cinture.
- La fissaggio sul dispositivo di altri dispositivi o sistemi non approvati dal fabbricante, può causare gravi lesioni al paziente e/o essere fonte di incidenti.

Après avoir contrôlé le bon serrage de toutes les sangles et les conditions de santé du patient, il sera donc possible procéder à l'immobilisation. Pour effectuer le transfert il faut ainsi nécessairement serrer la sangle thoracique, qui sera relâchée lors que le patient sera immobilisé sur le plan dur vertébral. User's Manual

1 GENERAL INFORMATION

1.1 Aim and contents
The aim of this manual is to supply all the information necessary so that the client, will not only attain adequate use of the appliance, he will also be capable of using the instrument in the most autonomous and secure way possible. This includes information regarding technical aspects, functioning, maintenance, spare parts and safety.

1.2 Conservation of the instruction manual

The instruction and maintenance manual must be kept with the product, inside the specially provided container and above all, away from any substances or liquids which could compromise perfect legibility.

1.3 Symbols used

General or specific warning

See instructions for use

Lot number

Product code

CE Product compliant with specifications of the Directive 93/42/CEE

1.4 Servicing request

For any information regarding the use, maintenance and installation, please contact the Spencer Customer Care Service on +39 0521 541111 - Fax +39 0521 541222 e-mail: export@spencer.it for general informations about Spencer products, service@spencer.it for technical assistance or write to Spencer Italia S.r.l. - Via Provinciale, 12 - 43038 Sala Baganza (Parma) ITALY.

1.5 Demolition

Follow the current regulations.
1.6 Labelling
Each device has got an identifying label, positioned on the device itself and/or on the box. This label includes information about the Manufacturer, the product, CE mark, lot number (LOT) or serial number (SN).

2 | WARNINGS

2.1 General warnings

• Before carrying out any kind of operation on the appliance (training, installation, use), the operator must carefully read the enclosed instructions, paying particular attention to the correct safety precautions and to the procedures to be followed for installation and for correct use.

• In the case of any doubt, due to the correct interpretation of the instructions, please contact Spencer Italia S.r.l. for any necessary clarifications.

• Regularly check the appliance.

• In the case of any abnormalities or damage to the appliance, which could jeopardize the functioning and the safety, the appliance must be immediately removed from service.

• Do not alter or modify in any way the appliance; any such interference could cause malfunctions and injury to the patient and/or rescuer.

• The appliance must not in any way be tampered with. In such cases all responsibility will be denied for any malfunctions or injuries caused by the appliance itself.

• Those who modify or have modified, prepare or have prepared medical appliances in such a way that they no longer serve the purpose for which they were intended, or no longer support the intended service, must satisfy the valid conditions for the introduction onto the market.

• Ensure that all the necessary precautions are taken in order to avoid the hazards that can arise as the result of contact with blood or body fluids.

• Handle with care.

• Register and store with these instructions: lot number, place and date of purchase, first date of use, date of checks, name of users, any comments.

• Use of the device in anyway other than described in this manual is forbidden.

2.2 Specific warnings

• The product must be used by trained personnel only.

• If any failure or incorrect functioning of the device is detected, it must be immediately substituted with a similar item so that the rescue procedures are guaranteed without any interruption.

• When the device is being used, the assistance of qualified staff must be guaranteed.

• The extrication/spine immobilization device should not be exposed nor get in contact with heat sources or flammable agents.

• Store in a cool, dry, dark place and do not expose to direct sun. Do not store the device underneath any heavy objects.

• Use the device only as described in this manual.

• Always check the integrity of all the parts of the device before use.

• Replace immediately damaged parts.

• Do not flex the SED in excessive and extended way.

• Device must be carried out in compliance with the local health authority regulations.

• The device must be used following the procedures approved by the local Emergency Medical Services.

2.3 Contraindications and side effects

The use of this device, if used as described in this manual, does not present any contraindications or collateral effects.

3 | PRODUCT DESCRIPTION

3.1 Intended use

SED Spencer Extrication Device is an instrument for extrication and spine immobilization, ideal for all emergency situations. Particularly suitable for victims blocked in vehicles, collapsed buildings and uneasy places. It can also be used with pregnant women, children and babies. It is ideal for the immobilization of the hips and pelvis fractures. The vertical rigidity and the horizontal flexibility are the main characteristics of this device, which allows a rapid immobilization of the spinal column and a secure extrication. SED is completely X-ray compatible.

The patient cannot intervene on the device in any way.

3.2 Main components (fig. 11)

A Covering made of 400 D nylon covered in vinyl

B Internal supports made of birch splints

C Head support

D Strips of self-adherent strips to fix the nape and chin straps

E Abdominal buckles with 50 mm polypropylene tape

F Abdominal belts with 50 mm polypropylene tape

G Tight buckles with 50 mm polypropylene tape

H Tight belts with 50 mm polypropylene tape

I Lifting handles

J Nape strap made of 30 mm tape

K Chin strap made of 30 mm tape

L Posterior nape cushion and support filled with indestructible expanded polyurethane

M Cross-sectional strap

N Transport bag

O See back.

3.4 Technical data

Dimensions folded inside transport bag: 880 x 110 x h305 mm

Width extended: 900 mm

Length: 830 mm

Weight with bag and accessories: 3 kg

Load capacity: 230 kg

Functioning temperature: from -20 to +50 °C

Storage temperature: from -20 to +50 °C

Relative humidity: maximum 50%

4 | OPERATING INSTRUCTIONS

4.1 Transport and storage

Before transporting the appliance, make sure that it is correctly packed ensuring also that there are no risks of shocks, bumps or falls during the transport itself.

Keep the original packaging for use in case of any further transport.

Damage to the appliance caused during transport and handling is not covered by the guarantee. Repairs or replacement of the damaged parts are the responsibility of the client. The device must be stored in a dry, cool area away from direct sunlight. It must not be placed in contact with any substances or chemical agents which could cause damage and reduce safety characteristics.

4.2 Preparation

On receipt of the product:

• remove the packaging and display the material so that all components are visible

• check that all the components/pieces on the accompanying list are present

The appliance must be checked before every use so as to reveal any working abnormalities and/or damage caused by transport and/or storage.

If you want to check the device, all straps on the SED must be correctly attached so as to test using all straps and not just one buckle and strap. Using just one buckle and strap could lead to abnormal strain which would not be a conform simulation of the normal use.

Before putting the device in service make the following careful checks:

• general integrity (absence of cuts, holes, abrasions)

• self-adhesive strips and belts tightness

• integrity of straps (apply light pressure on the centre of the device in order to check any breakages; do not apply a flexion force higher than 12 kg)

4.3 Functioning

See back.

4.4 Troubleshooting Problem

Excessive vertical flexion

The belt buckle will not attach correctly

Cause

Probably one or more of the straps are broken

Probable buckle break

Remedy

Put immediately the device out of service and contact the service centre

5 | MAINTENANCE AND CLEANING

5.1 Cleaning

The cleaner must always wear adequate personal protection such as gloves to mask etc. during all cleaning and cleaning procedures.

Cleaning to mask out during cleaning operations can cause the risk of cross infection. For a correct device storage, clean it as follows. Clean by means of a clean cloth and bactericidal or germicidal disinfectant.

Rinse with hot water, extend the device and leave it to dry in a parched environment free from humidity. Keep clean the outward surface by means of a clean cloth. Do not use chemical solvents.

5.2 Maintenance

Establish a maintenance programme and periodic testing, identifying a reference employee.

The inspection frequency is determined by factors such as legal requirements, the type of use, frequency of use, environmental conditions during use and storage.

The person responsible for every day maintenance can only substitute the spare parts indicated on paragraph 6.2 "Spare Parts". All other substitutions or repairs can be carried out only by the manufacturer or by a centre authorised by the manufacturer.

For any operations that are not carried out directly by the manufacturer but by an authorised centre, we have to underline that a report regarding all operations carried out must be requested. This will permit both Spencer Italia S.r.l. and the end user to keep a log book regarding the operations carried out on the device.

The device does not require programmed servicing.

5.2.2 Special servicing

Only the manufacturer or centres with written authorisation are authorised to complete any special servicing operations.

For any operations that are not carried out directly by the manufacturer but by an authorised centre, we have to underline that a report regarding all operations carried out must be requested. This will permit both Spencer Italia S.r.l. and the end user to keep a log book regarding the operations carried out on the device, as well as indicated in the following instruction manual, has an average life span of 5 years.

6 | ACCESSORIES AND SPARE PARTS

Manual de Uso y Manutención

1 | INFORMACIONES GENERALES

1.1 Fin y contenido

Este manual tiene la finalidad de dar al cliente todas las informaciones necesarias en manera que, además de un adecuado uso del dispositivo, sea capaz de manejar el mecanismo en el modo más autónomo y seguro posible. Este manual contiene informaciones referentes al aspecto técnico, el funcionamiento, la manutención, los recambios y la seguridad.

1.2 Conservación del manual de uso

El manual de uso y manutención debe ser conservado en las cercanías del producto, dentro de un estuche apropiado y, sobre todo, al amparo de cualquier elemento o sustancia que pueda comprometer la perfecta legibilidad.

1.3 Símbolos utilizados

Advertencias generales y/o específicas

Consultar el manual del usuario

Número de lote

Código identificativo del producto

Product conforme a los requisitos previstos en la Directiva 93/42/CEE

1.4 Pedido de asistencia

Para cualquier tipo de información relativa a la correcta interpretación de las instrucciones, al uso, a la manutención, a la instalación, a la devolución, contactar el Servicio Asistencia Clientes Spencer al número +39 0521 541111 - Fax +39 0521 541222 e-mail: export@spencer.it para informaciones gerais sobre los productos Spencer, service@spencer.it para asistencia técnica o bien escribir a Spencer Italia S.r.l. - Via Provinciale, 12 - 43038, Sala Baganza (Parma) ITALY.

1.5 Descarte

Atenerse a las normas vigentes.

1.6 Etiquetado

Cada dispositivo está equipado con una etiqueta, ubicada en el propio dispositivo o en el envase, en el que aparecen la identificación de datos del fabricante del producto, marcado CE, serie número (SN) o lote (LOT). Estos no deben ser quitados ni cubiertos.

2 | ADVERTENCIAS

2.1 Advertencias generales

Antes de efectuar cualquier operación sobre el dispositivo (tales como instalación, formación, empleo), los operadores deben leer atentamente las instrucciones contenidas en la presente publicación, con particular atención a cuanto se refiere a las oportunas precauciones de seguridad y a las metodologías de instalación y empleo.

• En caso de dudas sobre la correcta interpretación de las instrucciones, al uso, a la manutención, a la instalación, o de la devolución, contactar el Servicio Asistencia Clientes Spencer al número +39 0521 541111 - Fax +39 0521 541222 - e-mail: export@spencer.it para todo tipo de información sobre los productos Spencer, service@spencer.it para asistencia técnica o bien escribir a Spencer Italia S.r.l. - Via Provinciale, 12 - 43038, Sala Baganza (Parma) ITALY.

1.5 Mise au rebut

Suivre les normes en vigueur.

1.6 Étiquetage

Cada dispositivo es etiquetado con una etiqueta posicionada sobre el dispositivo mismo y/o en su embalaje, mencionando las donadas de Fabricante, del producto, marcaje CE, número del lote (LOT). Esta etiqueta no debe jamás ser eliminada o cachada.

Notice d'utilisation et d'entretien

1 | INFORMATIONS GÉNÉRALES

1.1 But et contenu

Cette notice a pour but celui de fournir au client toutes les informations nécessaires à fin qu'il soit capable de gérer le dispositif de façon la plus autonome possible autre à un correct emploi du même. Elle comprend les informations relatives à l'aspect technique, au fonctionnement, à l'entretien, aux pièces de recharge et à la sécurité.

1.2 Conservation de la notice d'utilisation
